

**AMENDMENTS TO THE CLAIMS**

1. (Currently Amended) A remote control trunk assembly for a saddle type vehicle comprising:

at least one lid:

an opening/closing mechanism for ~~permitting and rejecting the~~ opening and closing of each of said at least one lid, respectively; and

a radio signal receiving unit, said radio signal receiving unit ~~receives~~ receiving a radio signal for remotely operating said opening/closing mechanism, ~~whereby~~ said radio signal receiving unit is being disposed on top of said at least one ~~trunk; lid,~~

wherein said ~~radio-receiving~~ remote control trunk assembly is mountable on a rear portion of a vehicle body, said at least one lid ~~having~~ has a projection formed on a ~~outside on top of the rear trunk thereof, and~~ said radio signal receiving unit is disposed inside said projection on said at least one lid, and said projection is disposed at substantially a central portion of ~~the the~~ said at least one lid.

2. (Currently Amended) The trunk assembly according to claim 1, ~~wherein~~ ~~there is~~ further comprising a rear trunk and a pair of side trunks.

3. (Currently Amended) The trunk assembly according to claim 2 further comprising an opening/closing lever for each of said at least one lid, said opening/closing lever being provided in a lower portion of said rear trunk.

4. (Cancelled)

5. (Currently Amended) The trunk assembly according to claim ~~[[4,]]~~ 2, wherein said ~~radio-receiving~~ remote control trunk assembly is mountable on the rear portion of the vehicle body behind a seat, and said projection formed on top of ~~the trunk~~ said at least one lid serves also as a back rest of the seat.

6. (Currently Amended) The trunk assembly according to claim 1, and further comprising:

a switch for detecting ~~the~~ whether said at least one lid is open or closed, said switch ~~outputs~~ outputting a result of the detection to the radio signal receiving unit;

a lock mechanism actuated by a key actuator to lock or unlock ~~the~~ said at least one lid; and

a trunk catcher actuated by a pop-up actuator to pop up ~~the~~ said at least one lid simultaneously with unlocking ~~the~~ said at least one lid.

7. (Currently Amended) The trunk assembly according to claim 6, wherein said radio signal receiving unit responds to signals transmitted from the switch to control the pop-up actuator and the key actuator.

8. (Currently Amended) A remote controller for a remote control trunk assembly, the trunk assembly including at least one lid, an opening/closing mechanism for ~~permitting and rejecting the~~ opening and closing of each of the at least one lid, and a radio signal receiving unit which receives a radio signal for remotely operating the opening/closing mechanism, whereby the radio signal receiving unit is being disposed on top of the at least one ~~trunk lid~~, said remote controller comprising:

a locking button for locking the trunk;

an unlocking button for unlocking the trunk; and

a pop-up button for unlocking and popping-up the trunk;

wherein said radio signal receiving unit is mountable on a rear portion of a vehicle body, ~~said the at least one lid having~~ has a projection formed ~~outside on a top thereof, of the lid~~ and the radio signal receiving unit is disposed inside said projection on ~~said the at least one lid and~~ at substantially a central portion of the at least one lid.

9. (Previously Presented) The remote controller according to claim 8, and further comprising a radio signal, said radio signal transmitting to the radio signal receiving unit having a switch to control a pop-up actuator and a key actuator.

Claims 10-18 (Cancelled)
